17. ABSTRACT (MAX. 250 WORDS)

Lesson 7 begins the second question and answer sequence in the first unit. The function of this sequence is to review all the prepositions introduced in lesson 6. The new word "where" is introduced by the helper's asking a question containing the word "where". The student answers by reading the answer under the picture. The next sequence forces a choice between two possible answers requiring a discrimination between prepositions. "Where" then appears in the student reading. Pairing of phonetic elements in words such as where and white is begun. Story frames provide practice with new words by including short descriptions of pictures.
